1 Document Conventions

The following typographical conventions are used throughout this guide:

`/etc/passwd`	represents command-line commands, options, parameters, directory names and filenames
Next >	used to signify clickable buttons on a GUI dialogue
Note:	describes something of importance related to the current topic

2   Introduction

TBMR for Linux can only be installed on a x86_64 Linux (i.e. 64-bit) machine.

> *TBMR requires that Spectrum Protect BA client version 7.1 or later is already installed.*

A minimum memory of **6 GB RAM** is required for booting the recovery environment and running a recovery.

Please refer to this web page https://www.cristie.com/support/matrix/ to determine the latest OS and IBM Spectrum Protect client/server support for TBMR Version 9.6.1.

Before TBMR can be used it must also be correctly licensed. Cristie provides a 30 day trial license with the product.

3   TBMR Installation and Removal

The TBMR distribution media is provided for x86_64 Linux (i.e. 64-bit) machine only.

> *Note: TBMR should be installed and run by a user that has root access privileges.*

3.1   Install TBMR

The required installation files can be downloaded as follows:

Trial Version:

A Trial Version of the software can be obtained by completing a form on the Cristie website.

http://www.cristie.com/request-a-trial/

Existing Customers:

The software can be downloaded after logging into the Cristie licensing portal

https://portal.cristie.com/login/

The installation files can be found in the download package in the path `linux/install/` on the TBMR installation CD, DVD or ISO.

Installation Process RPM:

Log in as: `root`

Open a terminal and copy the installation file to say '/tmp'. Then to install from an RPM package enter:

```
[root@TBMR]# rpm -ivh tbmr-9.6.1.3302-1.x86_64.rpm
```

Installation Process DEB:

Log in as: `root`

Copy the installation file to say '/tmp'. Then to install from a DEB package enter:

```
[root@TBMR]# dpkg -i tbmr_9.6.1.3302-1_amd64.deb
```

Installation Process Tar File:

Copy the installation files from the installation CD to the temporary directory:

```
[root@TBMR install]# cp tbmr-9.6.1.3302-1.linux.x86_64.tar.gz /tmp
```

Navigate to the temporary directory:

```
[root@TBMR install]# cd /tmp
```

Extract the tar file with the following command:

```
[root@TBMR tmp]# tar xvzf tbmr-9.6.1.linux.x86_64.tar.gz
```

To install TBMR enter:

```
[root@TBMR tbmr]# ./install
```

This will install all the relevant files and licenses.

TBMR is installed with a 30 day trial license. To extend this license, contact Cristie at support@cristie.com.

3.1.1   Upgrade Install

It is possible to upgrade an existing version of TBMR (6.x.x) to Version 9.6.1

Upgrading RPM installations

To upgrade install using an RPM package enter:

```
[root@TBMR]# rpm -U tbmr-9.6.1.3302-1.x86_64.rpm
```

Upgrading DEB installations

This uses the same syntax as running a clean install, i.e.:

```
[root@TBMR] install]# dpkg -i tbmr_9.6.1.3302-1_amd64.deb
```

Upgrading tar file installations

To upgrade previous TBMR tar based installations, copy the installation files from the installation CD to the temporary directory:

```
[root@TBMR /]# cp tbmr-9.6.1.3302-1.x86_64.tar.gz /tmp
```

Navigate to the temporary directory:

```
[root@TBMR /]# cd /tmp
```

Extract the tar file with the following command:

```
[root@TBMR tmp]# cd /tbmr
```

To install TBMR enter:

```
[root@TBMR tbmr]# ./install
```

When prompted, confirm that is is OK to overwrite files.

3.1.2   Existing Installations of other Cristie BMR products

TBMR cannot be installed alongside any other Cristie BMR product.

3.2   Remove TBMR

Uninstall RPM installations

To uninstall the RPM package, use:

```
[root@TBMR /]#
[root@TBMR /]# rpm -e tbmr
```

Uninstall DEB installations

To uninstall the RPM package, use:

```
[root@TBMR /]#
[root@TBMR /]# dpkg -P tbmr
```

Uninstall tar file installations

To uninstall the package, navigate to the directory where TBMR was installed and run the install script with the *-u option*.

```
[root@TBMR /]# cd /tmp/tbmr
[root@TBMR /]# ./install -u
```

4 Product Licensing

When first installed, TBMR may be used for a trial period of 30 days. During that period TBMR is fully functional. If the software is subsequently un-installed and later re-installed on the same system, the 30 day period continues from the date of the first installation.

If you wish to use the software beyond the trial period, you must register and purchase a license from Cristie Software Ltd.. Alternatively, and in special circumstances, Cristie Software Ltd. may extend the license period if you wish to trial the software beyond that period.

If you purchase the product, then contract and license activation codes will be available on the Cristie Licensing Portal. Together these codes will enable you to fully activate the product.

The following sections discuss this in more detail.

4.1 Trial License

A 30-day trial license commences from the date of installation. The TBMR configuration file generator tbmrcfg will not run after this period expires.

You may use the Cristie License Manager to add or inspect license details at any time. This is acheived by opening a terminal and entering:

```
#
# licmgr -p tbmr
```

Entering this command, will display the Cristie License Manager. This shows Machine attributes, Contract ID. the installed host System signature, the current product (TBMR in this case), the product version, the trial end date and the current license Status.

```
[root@np-rhel9 /]# licmgr -p tbmr
=============================================================
                  Cristie License Manager Version
                              9.6
             Copyright (C) 2012-2024 Cristie Software Limited
=============================================================
  Machine attributes : {virtual, server}
         Contract ID : 0
           Signature : 7W2S29A2-ZBQU3MGE-6VZLRBSM-U46D6PPD
             Product : Bare Machine Recovery for Tivoli TSM (TBMR)
             Version : 9.6
       Trial ends on : 2024-05-18

              Status : Trial licence
```

The TBMR configuration file generator will become active again when a full license has been purchased from Cristie Software Ltd. and the new contract and activation code entered via the Cristie License Manager.

4.2 Full License

A Full license entitles the Customer to product support and upgrades for the duration of the license period.

To upgrade from the trial license to a full license, you need to apply for a full license activation code either via the Cristie Licensing Portal website or via the product Cristie License Manager. In either case you will need to first register an account on the Cristie Licensing Portal (located at https://portal.cristie.com/login). A Contract ID will be created and provided to you when you purchase a license.

These are the various codes used in the Cristie licensing process:

Contract ID: A 4-digit number supplied by Cristie Software Ltd. Sales during the license purchase process.
Agreement Number: Same as *Contract ID* at the moment.
Contract Code: 35-character contract code obtained from the Cristie Licensing Portal
Activation Code: 35-character support activation code obtained from the Cristie Licensing Portal

In special circumstances a 'bulk license' may be issued by Cristie Software Ltd. for customers that order a significant number of product licenses. Please contact your Cristie sales representative if you wish to discuss this service.

Note this discussion assumes that TBMR is already installed on a Customer production machine.

### 4.2.1 Setting up a Cristie Licensing Portal account

To setup a new account on the Cristie Licensing Portal follow the following steps. To do this you will need your 4-digit Contract ID and contract setup password. These will be provided by email from Cristie Software Ltd. when you purchase a product license.

Note: Your Contract ID may have been supplied to you as your contract Agreement Number. In that case please use your Agreement number in place of the Contract ID throughout.

1. On a suitable machine that has Internet access run a browser (such as Microsoft Internet Explorer on Windows) and navigate to the Cristie Licensing Portal web page at https://portal.cristie.com/login.

Select Register to create a new account. Enter your new account details (note this is an example):

Then click Create. If successful the following is shown.
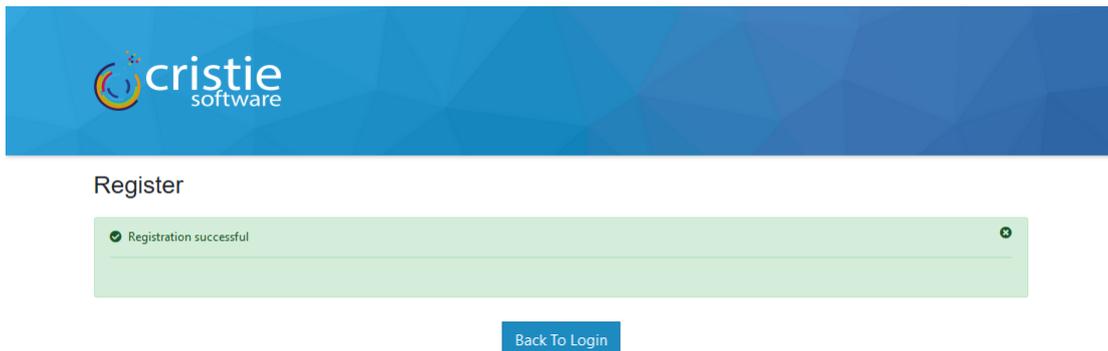

At this point you may now log in to the Cristie Licensing Portal using the E-mail ID and password setup in the previous steps.

4.2.2 Manual activation

This involves activating using the Cristie Licensing Portal as follows. This discussion assumes your contract is already setup on the Cristie Licensing Portal.

Assign your Activation code on the TBMR host machine by opening up a terminal and entering:

```
#
# licmgr -p tbmr --act xxxxxxxx-xxxxxxxx-xxxxxxxx-xxxxxxxx
```

(where xxxxxxxx-xxxxxxxx-xxxxxxxx-xxxxxxxx is your Activation code, which can be obtained by signing into the Cristie Licensing Portal) and use the **Activate Licenses** option. You will need your host's IP address, hostname and license signature. The latter can be obtained from the licmgr -p tbmr output.

```
[root@np-rhel9 /]# licmgr -p tbmr
================================================================
                    Cristie License Manager Version
                              9.6
            Copyright (C) 2012-2024 Cristie Software Limited
================================================================
  Machine attributes : {virtual, server}
         Contract ID : 0
           Signature : 7W2S29A2-ZBQU3MGE-6VZLRBSM-U46D6PPD
             Product : Bare Machine Recovery for Tivoli TSM (TBMR)
             Version : 9.6
       Trial ends on : 2024-05-18

              Status : Trial licence
```

The Cristie License Manager will be refreshed showing your Contract ID, the new
Activation code and your contract support end date.

```
